

The graph displays the United States Money Supply from January 1978 to January 1983. The historical data (labeled 'his') shows a steady upward trend from an index of about 15 to 23.5 by mid-1980. From this point, a forecast is provided, centered around a median (red circles) and surrounded by confidence intervals (shaded areas). The median forecast projects a continued upward trend, reaching approximately 25.5 by January 1983. The 10% confidence interval (darkest blue) is the narrowest, while the 60% confidence interval (lightest pink) is the widest, indicating increasing uncertainty over time.
