

The chart displays the United States Money Supply from January 2010 to January 2015. The historical data (labeled 'his') shows a steady increase from approximately 100 to 140. Starting in mid-2012, a forecast is provided, showing a projected decline to around 128 by January 2015. The forecast includes a median prediction (red line with circles) and several confidence intervals (shaded areas) ranging from 10% to 60% probability. The uncertainty in the forecast increases significantly as time progresses.

Date	Historical Money Supply (his)	Median Forecast
2010 01	100.0	-
2011 01	118.0	-
2012 01	132.0	-
2012 07	140.0	138.5
2013 01	-	137.5
2014 01	-	133.0
2015 01	-	128.0
