

The chart displays the United States Money Supply from January 1989 to January 1994. The historical data (labeled 'his') shows a steady increase from approximately 35 to 40.5. Starting in early 1991, a forecast is provided, centered around a median value (red circle) that continues the upward trend. The forecast includes probabilistic intervals, with the 10% interval (darkest blue) widening from a range of about 40.5-40.5 in 1991 to approximately 37.5-51.5 by 1994. The 60% interval (lightest blue) also widens, spanning from about 39.5 to 50.5 in 1994.
