

The chart displays the United States Industrial Production Index from January 1989 to January 1994. The historical data (blue line) shows a general upward trend with some fluctuations, starting around 68 and ending around 74.5 in mid-1991. From this point, a forecast is provided, showing a continued upward trend. The median forecast (red line with circles) reaches approximately 80 by January 1994. The forecast is accompanied by confidence intervals, with the 10% interval (darkest blue) being the narrowest and the 60% interval (lightest pink) being the widest. The intervals widen significantly as the forecast extends further into the future.

| Date    | Historical / Median Forecast | 10% CI      | 20% CI      | 30% CI      | 40% CI      | 50% CI      | 60% CI      |
|---------|------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| 1989 01 | 68.0                         | -           | -           | -           | -           | -           | -           |
